To The Windermere Members,

Anser Advisory, part of Accenture, has partnered with the Water Finance Exchange (WFX) in communities requiring infrastructure funding and rate-making assistance. We are happy to bring them to Windermere to evaluate the system's needs.

Background

Water Finance Exchange (WFX), a 501(c)(3), is a trusted intermediary that works closely with federal and state stakeholders, communities, philanthropy, and the financial sector to address the water infrastructure funding shortage facing thousands of communities across the U.S.

WFX believes water infrastructure is more than pipes and pumps; it is a catalyst for economic development and a cornerstone for public health and environmental needs. All communities should have affordable and sustainable water and sanitation.

Rogelio Rodriguez

Director of Finance and Texas Infrastructure Fund

Rogelio works closely with local governments, community members, funding agencies, and philanthropy to provide solutions from problem to project for water utilities, from strategic problem solving, capital planning through financing, transaction execution, and post-project capital planning. Working to bring together community water solutions with funding.

As water is a foundational utility for community health and prosperity, in 2021, he joined Water Finance Exchange as a Director after 25 years in public finance investment banking. At WFX, he oversees community engagements to bring scalable water, wastewater, and flood infrastructure solutions. He focuses on regional collaborations, water resource management, project design and implementation, and holistic solutions that consider health, affordability, and economic opportunity in this work. Rogelio believes in meeting communities where they are. With the tremendous resources at WFX, Rogelio helps to provide capacity in administration, operations, and finance.

He is a committed volunteer for Native American and K-12 education issues. Rogelio spends time with community members and can be found with the state and federal leadership advocating for water solutions.
